

Docket # 02-277

I am writing to you today to comment on Docket No. 02-277, we are opposed to de-regulation.

1.) We find it suspect that this story has not been covered by major media leading to our conclusion that this is being snuck past the American public.

2.) If we are supposed to be so concerned about major networks' advertising rates, leading to monopoly, where is their own concern about the quality of their programming? De-regulation would further stagnate program choices.
This is a free market.

3.) There is a group of people who are avowed capitalists who believe in state friendly media that is unregulated, and they are the Bathist Regimes of the Middle East.

Thank you for your attention.
Suzanne Clee and James Daily
